

Ray

# This is Ray.

The Super Remote that changes your TV forever. Now available for \$249 at [www.ray.co](http://www.ray.co)

The Ray Super Remote is an intuitive, touchscreen universal remote for the Internet generation. Elegant and smart, Ray offers a search function for quick access to channels and programming, as well as adaptive software that gets to know your family's tastes and preferences. With the ease and simplicity of a mobile OS, Ray is redefining control of the entertainment center in today's connected homes.

## Search and Discovery

Finally, an easy and focused method for finding what you want, when you want to watch it. Personalized recommendations, favorites, smart notifications are

centralized with Ray, in an intelligent and easy-to-use interface. Get to your content faster (like a particular sports match, live broadcast or film) and behind the scenes Ray's processors are constantly scanning data provided by networks to sleuth out patterns in what you like and don't like.

## Hardware

The Ray Super Remote is made with precision-machined high-grade aluminum and has an anodized finish. The rechargeable lithium ion battery will go 10 hours on a charge and the simple eye-pleasing charging stand will compliment any living room. As far as connectivity, Ray has Wi-Fi, Bluetooth, IR, a mic, a speaker, and the ability to control thousands of devices in your home.

## Software

Ray's apps and user interface were designed from the ground up by digital natives who have worked in entertainment and media for decades. It looks and feels like a smartphone, including an on-screen keyboard to simplify searches. Your customizable "Hello" screen includes several quick-hit categories (kids, sports, etc) and after running through setup in just a few minutes, you are a tap or swipe away from accessing your favorite content.

## Connect Your Home

Ray is the missing piece in your home A/V as well as first line interface to today's modern connected home. We squeezed in tech that ensures you're covered in the living room for years to come. Ray will provide your entire family control over the thermostats, lights, cameras, and more.
